

**Saturday, April 7 – 10 AM**

# **BUILD YOUR OWN RAIN BARREL**

## **Complete Your Rain Barrel During the Workshop!**

Rain barrels are an environmentally friendly way to conserve water and help keep your garden green. A rain barrel collects water running off your roof during storms, and stores it for later use in your garden. Workshop leaders will help you construct your own rain barrel, so it's ready to take home and be installed in your garden.

**All materials will be  
provided**

**Workshop at  
Washington Lake  
Park, Pavilion B  
(opposite  
Amphitheater,  
park in Lot F)**

- ▶ **Conserve water**
- ▶ **Enhance your  
garden**
